The CTI-Group

A constellation of 3 European manufacturers of high quality products for the healthcare sector

The CTI group consists of: CHIRANA T. Injecta in Slovakia, CHIRANA T. Injecta in Czech Republic and Vitrex Medical in Denmark.

The intention of CTI group is to serve as an “umbrella-organization”, where the individual companies collaborate to be “Committed to Innovation” and reach the joint goal:
- to develop, produce and distribute high quality, healthcare products.

CHIRANA T. Injecta, Slovakia

CHIRANA T. Injecta is a global, state of the art manufacturer of healthcare products, which was founded in 1935.

In 1947 CHIRANA T. Injecta started manufacturing glass syringes and they have ever since focused on development and production of high quality, disposable products for the healthcare sector. Through continuously updating production facilities and expanding their product range, they are today supplying:

- Hypodermic syringes
- Perfusion syringes
- Pen and Blood collection needles
- Insulin syringes
- Cannula and lancet needles

VITREX Medical, Denmark

Vitrex Medical was founded in 1967 and has since the 1970s mainly focused on supplying to the laboratory and analytical sector.

With more than 50 years of experience Vitrex Medical has become the largest manufacturer of capillary tubes in the world today by developing equipment, establishing technologies, and optimizing production processes. Vitrex Medical currently supplies:

- Capillary tubes and Micro-Hematocrit tubes
- Micro-pipettes
- Safety lancets
- Vacuum tubes and Blood collection needles
- Pen needles and Diabetic lancets

CHIRANA T. Injecta, Czech Republic

CHIRANA T. Injecta was founded in 1930. Since the early 1990s they have made substantial investments in upgrading the production resources, enabling the company to offer products in an unique quality.

Their more than 90 years of experience with manufacturing sutures has resulted in top priority within quality control, product development and sutures manufactured in line with state of the art technology. Their present range consist of:

- Surgical Sutures, Ligatures and Meshes
- Veterinary bottles and Eye needles
- Microsurgery and Cardiovascular sutures
- Antibacterial sutures

Capillary tubes

Different needs ...

... Different Tubes
In glass & plastic

Vitrex Micro Haematocrit Tubes

Vitrex Micro Haematocrit Tubes are quality products, that conform to international standard ISO 12772. The tubes are firepolished at the colour-coded end to reduce wear on the centrifuge seals. We recommend the colour-coded end to be sealed with Vitrex Wax plate. The colour-coding on the tubes and packaging indicates the impregnation of the tube: plain (blue colour), sodium heparin (red colour), ammonium heparin (green colour) and lithium heparin (orange colour). Each heparinised tube contains at least 4-7 IU heparin as prescribed by the standard. Vitrex Micro Haematocrit tubes are also available in plastic with plain, sodium or ammonium heparin in a volume of ~50 µl. The plastic tube provides the same effect as the glass tube.

The tubes are available in two types of packaging: Dispenser vials of 100 tubes each for hygienic and easy handling; and economy cardboard boxes of 1000 tubes, which reduce transport and handling costs. Special requirements regarding marking, dimensions or impregnation are possible.

Accessories

Vitrex Wax plate has 2x24 numbered positions per pair, which makes it easy to seal and transport samples. Each pair can be forced apart and used separately.

Vitrex End-to-End Pipettes

Vitrex End-to-End Pipettes are intended for applications where accurate capillary tube volume is required. The pipettes are in conformity with ISO 7550.

The pipettes are packed in glass vials with a dispenser top, that makes it easy to shake out one tube at a time and thereby ensuring hygienic handling.

The dispenser tops are colour-coded to indicate the tube volume in conformity with ISO 1769. Ten vials are packaged in a sturdy carton in order to protect the tubes from damage during handling or transport.

Vitrex Precalibrated Pipettes

Vitrex Precalibrated Pipettes are intended for applications where accurate capillary tube volume is required. The pipettes are in conformity with ISO 7550.

The pipettes are packed in cardboard vials. The pipettes have a standard length of 125 mm and the colour-coding on each pipette indicates the volume, which is measured from the base and up to the thin black ringmark.

Vitrex Capillary Dispenser

Vitrex Capillary Dispenser is a unique liquid handling tool, developed to empty capillary tubes for blood or other liquids.

FULLY AUTOCLAVABLE

Autoclavable at 121°C & 15 psi for sensitive applications.

LOW COST

This dispenser is specially designed for use with Diagnostic Kits.

UNIQUE TIP CONE

Designed to accept most Vitrex Capillary Tubes.

OPTIMUM SIZE

At a length of 130 mm this dispenser is the optimum practical size for blood collection.

Technical Specifications

Colour Code	Vol. µl	Pcs.	Article No.
Grey	Most Vitrex Capillary Tubes	1	569013

Recommended use

Step 1: Loading the device

Insert an unused capillary tube into the pipette tip. The end of the capillary tube must be visible in the tip.

Step 2: Filling the capillary tube

Hold the pipette horizontally and let the capillary tube be filled by capillary effect. Be sure not to press the plunger of the pipette.

Step 3: Emptying the capillary tube

Empty the capillary tube by pressing the plunger gently to the first stage. The liquid will be dispensed, but a small amount of liquid will be left in the tube. After a pause continue to depress the plunger to the second stage. The small amount of liquid left in the tube has also dispensed.

Step 4: After use

Remove the capillary tube carefully and discard in a suitable safety container.

Ready

1. Stage

2. Stage

Vitrex Pipette Fixed

LOW COST

This miniature fixed volume pipette is specially designed for use with Diagnostic Kits.

HIGH ACCURACY AND PRECISION

Each pipette is individually calibrated as per the ISO 8655 standard.

COLOUR-CODING

The colour-coding for each pipette indicates the volume - ensuring easy identification in the laboratory environment.

TWO STEP PLUNGER OPERATION

This unique feature makes the pipette a genuine miniature micropipette.

PRACTICAL SIZE

At a length of 130 mm this pipette is the optimum practical size for the pipetting function.

FULLY AUTOCLAVABLE

Autoclavable at 121°C & 15 psi.

Recommended use

Stage 1:

Depress the plunger to the first stage to aspirate the fluid. Place the tip of the micropipette in the desired fluid. Slowly release the pressure and allow the plunger to rise allowing the fluid to aspirate.

Stage 2:

Transfer the fluid to the desired location by again depressing the plunger to the first stage. Press the plunger in full (second stage) in order to fully dispense the fluid.

This operation also allows the Vitrex Pipette Fixed to be used for both reverse and repetitive pipetting.

Vitrex Lancets

Vitrex Octaheel Baby

Sterile Cutting Safety lancets

Vitrex Octaheel Baby lancets are intended for high volume blood flow with minimum depth of penetration. The safety lancets are primarily applicable for newborns and preemies. However, they can also be recommended for other applications, where short penetration depth and/or minimal compression of tissue is important.

Vitrex Octaheel Baby lancet is the latest edition offering improved ergonomics.

ACTIVATION BUTTON: Secured by safety tab.

NO CHOCKING HAZARD: Non-detachable safety tab.

USER SAFETY: Blade is fully shielded before and after use.

EASIER HANDLING: Anti-slip texture and one hand operation.

USER CONVENIENCE: Pre-loaded, button activated design.

PATIENT SAFETY: Single-use only. Sterilised by gamma irradiation.

PATIENT COMFORT: Ultra sharp blade with high speed cutting securing minimal trauma and fast healing.

NARROWED LANCING SLOT: Easier positioning.

Vitrex Soft Blood Glucose Lancets

Vitrex Soft Blood Glucose Lancets are intended for blood glucose measurement. The soft lancets are universal and compatible with most lancing devices especially Vitrex Compact Eject. The range includes standard soft lancets and siliconized soft lancets available in different sizes.

GOOD BLOOD FLOW

Triple ground needle point.

VERSATILE

Fit most commonly used lancing devices including the Vitrex Compact Eject lancing device.

STERILE

Sterilised by gamma irradiation at minimum 25kGy.

CONVENIENT

Boxes have dispensing feature.

NEW SILICONIZED NEEDLE

For less pain and smoother penetration.

Recommended use

1. Variable penetration

Dial the appropriate depth on the device between 1 (min.) and 5 (max.).

2. Simple and quick activation and reactivation

Pull back the grey slider to activate the mechanism.

3. Instant operation

Depress the grey button to operate the device.

4. Lancet removal

Simple and reliable lancet ejection.

Vitrex Compact Eject

Vitrex Compact Eject is a lancing device with a push button ejection. The device is clear adjustable with clear fixed end caps designed for Alternate Site Testing (AST).

VERSATILE

Suitable for use with Vitrex Soft Lancets and other most commonly used lancet brands.

VARIABLE PENETRATION

Nine depth settings from 1 to 5.

CONVENIENT

Simple and quick activation, reactivation and non-touch lancet removal.

Blood Glucose Monitor System

Easy to Read, Use and Carry

The system bag contains all necessary items for a safe and precise blood glucose measurement. It is light weight and can fit in a pocket or small handbag.

1. Vitrex Compact Eject:
Lancing device with push button ejection. Suitable for use with Vitrex Soft Blood Glucose Lancets and most other popular lancet brands.

2. Vitrex Soft Blood Glucose Lancets:
Universal soft lancet, compatible with most lancing devices.

3. Blood Glucose Test Strips:
For fast blood measurement.

4. Blood Glucose Monitor:
Easy-to-Use monitor with its two step operation, pre-set code, 5 sec. response time and memory of 500 tests with date and time.

DIABETES

Chirana® Insulin and Tuberculin Syringes

Chirana Insulin and Tuberculin syringes are with integrated needle for single use. The needle cap is made of LATEX-FREE rubber gasket. The syringes are individually packed in boxes of 100 pcs. They are pyrogen-free and non-toxic.

USER CONVENIENCE: Needle permanently fixed to syringe body.

USER SAFETY: Integrated needle cap.

COMFORT: Grinded, precision lancet point and silicone treated tip for smooth penetration.

PATIENT SAFETY: Single-use only. Sterilised by ETO. Dead space is minimized to reduce waste and transmission of infectious agents. The dead space does not exceed the limits (EN ISO 8537:2016, art. 5.11.1).

How to Use

1 Pull the paper tab off the pen needle.

2 Screw needle onto the end of the insulin pen.

3 Remove outer needle cover.

4 Remove inner needle cover to expose the needle.

Your pen is now ready for use.

Medoject Fine[®] Pen Needles

Medoject Fine Pen Needles are made of polypropylene hub and stainless steel tube. They are intended for Insulin application via most Insulin pens. The needles are sterile and individually packed.

COMFORTABLE INJECTION

European, premium needle quality, triple beveled tip and precision lancet point grinding.

THIN WALL TECHNOLOGY

Ensures optimal insulin flow.

SILICONIZED NEEDLE

Minimizes irritation and gives a smooth penetration.

SHORT NEEDLES

Reduce risk of a painful injection into the muscle.

VERSATILE

Fit most commonly used insulin pens.

COLOUR-CODING

Simple identification of different needle lengths.

NEW

Vitrex Safety Pen Needles With Dual Automatic Protective Shields

Vitrex Safety Pen Needles are intended for a safe and simple insulin injection via most insulin pens. The application is the same as normal insulin pens, but they offer an automatic double protection without extra operations after using. The coloured indicator shields in the front and back-end provide a visual, physical and audible confirmation of safety. The needles are sterile and individually packed.

SAFETY FUNCTION

Coloured automatic safety shields on front and back-end providing double protection after using.

COMFORTABLE INJECTION

Triple sharpened needle and top lubrication technology, which offers minimum penetration force.

SIMPLE AND SAFE APPLICATION

Easy to trigger the safety function after injection. Same application as normal pen needles, but with a safety function both blocking top and bottom needle after use.

VERSATILE

Uniform hub screw which fits most commonly used insulin pens.

Vitrex Blood Collection System

New and higher standards in the diagnostic laboratory field require an improved performance of the blood collection system. Vitrex Blood Collection System is the answer.

Vitrex Blood Collection System consists of a full range of products including our Blood Collection Tubes, Needles and Holders, as well as the newly added products: Luer Slip adapter, Luer Slip adapter + holder, Luer Slip adapter + Intravenous needle and Luer Slip adapter + holder + Intravenous needle.

Vitrex offers two different brands of blood collection tubes: Vacusence and Vacusence+. Vacusence tubes are of Turkish origin with a lead time of 8-10 weeks. Vacusence+ tubes are made in Europe with a lead time of 3-4 weeks. Vitrex Blood Collection Tubes are made of unbreakable PET tube, butyl rubber stopper and polyethylene cap. We primarily offer medical paper labelled tubes, but tubes with transparent label or prebarcoded tubes are also available upon request.

All components of Vitrex Blood Collection System are designed to fulfill the requirements of blood collection procedures, improve patient's comfort, help user's safety and get reliable test results. The latest products in our Blood Collection System range are of corresponding high quality and carefully selected to complete the range.

USER VERSATILITY: Series combination blood collection types for customer selection.

USER CONVENIENCE: Allows for multiple draws with a single vein puncture.

EXCELLENT PERFORMANCE: High quality rubber sleeve has excellent self-sealing performance.

FLEXIBLE PACKAGING: Single blister package, single pouch or single PE bag.

Vitrex Serum Gel and Clot Activator Tubes

Vitrex Vacusence Serum Gel and Clot Activator Tubes contain inert gel; during centrifugation, the gel forms a stable barrier between serum and blood cells. The tubes allow to obtain more serum than regular tubes due to the cleaner separation of serum from the clot. The range of application is: clinical chemistry, immunology, protein electrophoresis, serology, microbiology and toxicology.

Accessories IV Administration

Within IV Administration for Chiraplus Infusion set and Chirahem Transfusion set we offer following accessories:

Chiraplus™ Spikes: Intended for comfortable and safe drug manipulation.

Chiraplus™ Injection ports: Offer additional drug administration when applied with other devices.

Chiraplus™ Stoppers: Give a short-term option for storage or transfer of solution.

Chiraline™ Extension lines: Extension tubing in 45 cm or 180 cm, where Luer lock ends are available.

Chiraway™ 3-way stopcock: Available in standard or lipid resistant material with colour-coding differentiation.

Product	Pcs./Box	Pcs./Carton	Article No.
Infusion spike Red air 0.1 µm + 5 µm solution filter	100	1000	CHIS01

Vitrex Alcohol Swabs

Vitrex Alcohol Swabs are an easy and convenient way to cleanse the skin and help fight bacteria at the site of application. Use as an antiseptic skin cleanser before injections and blood sampling.

The size of the Disinfection Swab is 30x60 mm. Each Alcohol Swab is individually sealed and disposable for convenience and safety.

Technical Specifications

Description	Size	Content	Identification No.	Pcs./Box	Article No.
Alcohol Swabs	30 x 60 mm	82% Ethanol	1U8K-YGJD-J103-YQRW	100	521413
Alcohol Swabs	30 x 60 mm	82% Ethanol + 0.5% Chlorhexidine	NQ1P-3GSC-U100-G3GE	100	522413

Shelf life 5 years

Alcohol Swabs are currently approved for sales in:
Norway, Finland, UK, Germany, France and Austria.

(Updated: 2023-10. Please consult our website: vitrexmedical.com for new updates in the list of approved countries).

Regulated according to: REGULATION (EU) No 528/2012 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 22 May 2012 concerning the making available on the market and use of biocidal products.

Transit packaging

Pallet

Packaging:
Primary packaging: 100 pcs.
Transit packaging: 10,000 pcs.
Pallet: 400,000 pcs.

Vitrex Safety Containers

Vitrex Safety Containers are designed for hospitals and healthcare institutions for clinical disposal of lancets, needles, scalpels, syringes and other types of sharps.

Each type of lid is specially designed to help the user dispose needles, syringes, etc. lid with reversible closure can be safely fixed.

Technical Specifications

Description	Size	Content	Article No.
Safety container	4.7 cm x 12.9 cm	0.2 l.	193800

Safety container	13.7 cm x 18 cm	2 l.	194300
Safety container	21.1 cm x 19.5 cm	5 l.	194700

Surgical Sutures & Meshes

State of the art

When experience matters

Our surgical sutures are manufactured in line with state of the art technology. Each individual production process is subject to strict scientific quality control.

Continuous inspection of both mechanical and microbiological characteristics is given top priority. We have more than 90 years of experience in manufacturing surgical sutures.

Our team understands the specific needs of medical professionals by providing them with access to the most complete portfolio of surgical sutures. The result is the current modern product range of absorbable and non-absorbable sutures, which consists of more than 2500 individual surgical suture products.

Production takes place in accordance with GMP guidelines, and a comprehensive quality management system in line with ISO 13485 has been implemented.

All products have been CE marked since 1999.

Surgical Meshes

Surgical Meshes have become standard for the repair of abdominal wall hernias. Surgical mesh is a sterile woven material designed for permanent implantation within the body during open or laparoscopic procedures.

A wide range of mesh implants are available, with two main functions: to stabilize and strengthen soft tissue defects, and to act as a sling to support prolapsed organs and viscera. It is most commonly used in pelvic organ prolapse, urinary stress incontinence and hernia repairs.

CAPROMESH meshes

Partially absorbable

The sterile, partially absorbable, composite mesh is made from two components: one absorbable and one non-absorbable. After absorption of the absorbable part, only the polypropylene mesh remains in the body.

Indication: Capromesh is indicated in the operative treatment of weakened abdominal wall and fascial defects - in particular hernias, the healing of which requires long-term bridging or strengthening of the damaged structures.

CHIRALEN meshes

Non-absorbable

The sterile and surgical meshes are made from undyed polypropylene filaments. The knitted filaments have a smooth and hydrophobic surface, which biologically are absolutely inert. Chiralen meshes are available in different sizes, all offering high strength and high flexibility. Chiralen meshes are available in a weight of approx. 110 g/m² or in the light version with a weight of approx. 30 g/m².

Indication: Chiralen meshes are indicated in the operative treatment of fascial defects, in particular hernias, which require long-term bridging of damaged structures.

Surgical Sutures - Absorbable threads

CHIRASORB rapid braided

Intended for use in Skin closure, Paediatric surgery, Episiotomies, Circumcision, Closure of oral mucosa and Ophthalmic surgery for conjunctival sutures.

Composition	Colour	Range	Characteristics
Braided and coated suture made from 90% glycolide and 10% L-lactide	Violet and Natural	6/0 to 2 USP	Absorbable, multifilament, coated, synthetic, high tensile strength, reduced capillary effect, short-term healing

CHIRLAC rapid braided

Intended for use in Gynaecology, Skin Closure, Ophthalmic, Odontology and Paediatric surgery.

Composition	Colour	Range	Characteristics
Braided and coated suture made of Polyglycolic acid (PGA)	Violet and Natural	6/0 to 4 USP	Absorbable, multifilament, coated, synthetic, high tensile strength, reduced capillary effect, short-term healing

MONOLAC monofilament

General soft tissue approximation and/or ligation in all specialties, where an absorbable material is indicated.

Composition	Colour	Range	Characteristics
Monofilament suture made of Glycolide and ϵ -caprolactone	Violet and Natural	6/0 to 2 USP	Absorbable, monofilament, synthetic, high tensile strength, excellent handling properties, mid-term healing

CHIRASORB braided

Intended for use in general soft tissue approximation and/or ligation in all specialties, including use in Ophthalmic surgery.

Composition	Colour	Range	Characteristics
Braided and coated suture made from 90% glycolide and 10% L-lactide	Violet and Natural	10/0 to 6 USP	Absorbable, multifilament, coated, synthetic, high tensile strength, reduced capillary effect, mid-term healing

CHIRASORB Plus braided

Antibacterial

Intended for use in general soft tissue approximation and/or ligation in all specialties.

Composition	Colour	Range	Characteristics
Antibacterial, braided and coated suture made from 90% glycolide, 10% L-lactide and chlorhexidine diacetate	Violet and Natural	5/0 to 4 USP	Absorbable, multifilament, anti-bacterial coating, synthetic, high tensile strength, reduced capillary effect, mid-term healing

CHIRLAC braided

Intended for use in general soft tissue approximation and/or ligation, surgical adaptation of Muscles and Fascia, suturing of Parenchymal organs, Peripheral nerves and ligatures of small vessels and for Intradermal suturing.

Composition	Colour	Range	Characteristics
Braided and coated suture made of Polyglycolic acid (PGA)	Violet and Natural	9/0 to 6 USP	Absorbable, multifilament, coated, synthetic, high tensile strength, reduced capillary effect, mid-term healing

Polydox monofilament

Intended for use in general soft tissue approximation, Orthopaedics, Fascia Closure, Urology, Gynaecology and Plastic surgery. Recommended for long-term healing.

Composition	Colour	Range	Characteristics
Monofilament suture made of Poly-p-dioxanone	Violet and Natural	7/0 to 4 USP	Absorbable, monofilament, synthetic, high tensile strength, excellent knotting properties, long-term healing

Surgical Sutures - Non-absorbable threads

CHIRAFLON monofilament

Intended for use in all surgical specialities, especially Orthopaedic, Traumatology (tendons), Plastic and Ophthalmic surgery (optimal, temporary, easily, removable suture).

Composition	Colour	Range	Characteristics
Monofilament suture made of Polyvinylidene Fluoride (PVDF) - similar to Teflon	Blue	8/0 to 3 USP	Non-absorbable, monofilament, synthetic, no capillary effect, very smooth, excellent knotting properties, easy to handle, physiologically inert

Chiralen monofilament

Intended for use in all surgical specialities, especially Cardiovascular, Plastic, Reconstructive, Ophthalmic, Orthopaedics and Traumatology (tendons).

Composition	Colour	Range	Characteristics
Monofilament suture made of Polypropylene	Blue and Black	10/0 to 2 USP	Non-absorbable, monofilament, synthetic, no capillary effect, smooth, non-porous surface, suitable for stitches in infected wounds

SILON monofilament

Intended for use in Plastic and General surgery and wherever suturing the skin.

Composition	Colour	Range	Characteristics
Monofilament suture made of Polyamide 6	Blue and Black	10/0 to 2 USP	Non-absorbable, monofilament, synthetic, very smooth, excellent knotting properties, easy to handle, loss of tensile strength after long-term implantation

TERVALON braided

Intended for use whenever non-absorbability and low friction passage through tissues are needed. It is especially useful in suturing Tendons, Schwann sheaths and skin in Plastic and Reconstructive surgery.

Composition	Colour	Range	Characteristics
Braided and coated suture made of Polyester	Green and White	6/0 to 6 USP	Non-absorbable, multifilament, synthetic, high tensile strength, no capillary effect, well tolerated by the tissue, low friction

SILON braided

Intended for use in Skin Closure, Subcutaneous tissue, Transversely cut muscles, Fascia, Peritoneum, Gastrointestinal Tract and Blood vessels ligation.

Composition	Colour	Range	Characteristics
Braided suture made of Polyamide	White and Black	5/0 to 5 USP	Non-absorbable, multifilament, synthetic, high tensile strength, excellent knotting properties, loss of tensile strength after long-term implantation

Silk braided

Intended for use in Skin closure, Subcutaneous tissue, Fascia, Peritoneum, Plastic surgery, Gynaecology and the organs of the Gastrointestinal tract.

Composition	Colour	Range	Characteristics
Braided and coated suture made of Silk	Black	9/0 to 5 USP	Non-absorbable, multifilament, synthetic, no capillary effect, loss of tensile strength after long-term implantation

For more information about sutures and meshes, and catalogue of full product range, please contact us.
